

FANUC Robot M-900iB

FEATURES

FANUC Robot M-900iB is an intelligent heavy payload robot series with the capacity of 280 kg - 700 kg.

- Six models are available to meet a variety of applications.
 - **FANUC Robot M-900iB/700, /400L**
These models are heavy payload type. They can be applied to large glass handling, drilling and riveting for aircraft body panel. The long arm type 400L has wide operating space and it can be applied to car body lifting and large size structure handling.
 - **FANUC Robot M-900iB/360, /280L**
These models are high speed type. Compact wrist and high speed motion will meet the needs in various applications, such as transferring, spot welding. These models can be also mounted on a ceiling.
 - **FANUC Robot M-900iB/280**
This model is a high rigidity type which has 280 kg payload capacity and the same operating space as M-900iB/360.
 - **FANUC Robot M-900iB/330L**
This model is a high payload and long arm type which can cover the application range between M-900iB/400L and M-900iB/280L.
- The wrist can be used in severe environment because it has IP67-equivalent durability (dust and drip).
- Latest intelligent functions with iRVision (integrated vision) are available.

Application Examples

Car body panel lifting

Aircraft body panel drilling
